

# BSc (Hons) Accounting & Finance with Foundation Year Programme Handbook

# **Introduction to the Programme**

Welcome to the BSc (Hons) Accounting and Finance with Foundation Year programme handbook. This handbook provides you with information about the structure of your programme and a description of each of the modules that you will study.

The programme is made up of the modules listed below. An outline of the content of each of the modules and the assessment methods used can be found in the Module Detail section on iLearn.

Level 3

Module			Module Type
Code	Module Title	Credits	(Core/Option)
	Developing Academic Skills	20	Core
	Using Numeracy, Data & IT	20	Core
	Research Skills and Using Information	20	Core
	Values, Ethics & Working Collaboratively	20	Core
	Structure of Business	20	Core
	Technology in Organisations	20	Core

#### Level 4

Module Code	Module Title	Credits	Module Type (Core/Option)
FIN4004	Financial Accounting	20	Core
FIN4005	Cost Accounting	20	Core
HRM4001	Developing Personal and Management Skills	20	Core
FIN4006	Business Maths	20	Core
BUS4007	Understanding the Business Environment (Accounting and Finance)	20	Core
BUS4002	Management Information Systems	20	Core

# Level 5

Module Code	Module Title	Credits	Module Type (Core/Option)
FIN5005	Business Law	20	Core
FIN5006	British Taxation	20	Core
FIN5007	Accounting & Audit Framework	20	Core
FIN5009	Financial Reporting	20	Core
FIN5004	Management Accounting	20	Core
FIN5008	Decision Making	20	Core

# Level 6

Module Code	Module Title	Credits	Module Type (Core/Option)
FIN6002	Audit	20	Core
FIN6003	Financial Management	20	Core
FIN6004	Ethics	20	Core
FIN6005	Professional, statutory and current accounting issues	20	Core
RES6001	+RM & Diss ( 40 credits)	40	Core

Please note that modules may not be delivered in this order; please refer to your course timetable.

#### What is ACCA?

The Association of Chartered Certified Accountants (ACCA) is a professional accountancy body which works all over the world to build the profession and make society fairer and more transparent. The degree maps over to ACCA papers F1-F9, the maximum available. This means that students can go on to complete the ACCA professional qualifications after studying Arden University's accredited BSc course rather than starting from the beginning. Arden University's programme gives the student both a professional and academic qualification. Memberships gives students access to a wide range of resources that may help them during their studies.

# **ACCA Exemptions**

Students who successfully complete the BSc (Hons) Accounting and Finance with Foundation Year will be exempt from papers F1 to F9 of the ACCA (the Association of Chartered Certified Accountants) Qualification; this is the maximum number of exemptions that can be awarded! These are detailed in the table below.

BSc (Hons) Accounting and Finance Modules	ACCA Qualification Exam Paper Exemptions
On completion of course	Papers F1 – F4
Management Accounting (FIN5004)	Paper F5
British Taxation (FIN5006)	Paper F6
Financial Reporting (FIN5009)	Paper F7
Audit (FIN6002)	Paper F8
Financial Management (FIN6003)	Paper F9

# **Arden University Assessment Regulations**

Students will be assessed in accordance with the standard Arden University assessment regulations which can be found on the Arden University website <a href="http://arden.ac.uk/">http://arden.ac.uk/</a>

#### **10. Programme Aims**

The overall aim of the AU BSc (Hons) Accounting & Finance with Foundation Year is to enable students to acquire knowledge, understanding and a range of practical skills relating to key and inter-connected accounting disciplines applicable to a range of commercial and non-commercial sectors, local, national and global, and in a variety of geographical and cultural settings. Simultaneously students will develop a range of transferrable skills that will assist them in as they pursue their careers or further relevant study.

# More specifically at Level 3 it will:

- enable learners to confidently identify and use relevant understanding, methods and skills to complete tasks and address problems.
- equip learners with basic numeracy, academic and research skills in preparation for future undergraduate study.
- enable learners to take responsibility for initiating and completing tasks and procedures as well as exercising autonomy and judgement within limited parameters.
- reflect awareness of different perspectives or approaches when collaborating with others within an area of study or work.
- enable learners to develop a basic understanding across a range of management and technology disciplines.

#### At Levels 4-6 it will:

- enable students to develop professional level skills and understanding across a range of accounting related disciplines.
- emphasise understanding of the external environment within which an organisation operates.
- promote understanding of the key aspects of current practice and the interconnectedness of key areas within the field of accountancy.
- equip students with the essential employability skills and tools to work ethically and professionally in a business environment and to be effective practitioners, when working independently and when collaborating with others.

- enable students to communicate effectively through a variety of media and presentational forms used in business.
- equip students to work within multicultural settings and to appreciate the complexity of decision making in such contexts.
- develop decision making skills which best support the growth of enterprise.
- provide an intellectually stimulating online academic environment in which students can develop confidence as independent learners and as members of an international community of learners and thereby inspire students to become lifelong learners.

The programme is designed to provide opportunities for students to develop their knowledge and skills in business in a flexible way. Learning materials have been developed which allow students to maximise the time they have available for study and the programme structure allows students to determine the pace at which they learn. The programme also provides a range of supports for distance learning students thereby allowing international access.

11. Intended programme learning outcomes	11. Intended programme learning outcomes and the means by which they are achieved and demonstrated				
11a. Knowledge and understanding	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated			
At Level 3: With due regard to the QAA Recognition Scheme for Access to HE: The Access to Higher Education Diploma specification 2018, the intended programme learning outcomes are for students at Level are to: A1/0 Use factual, procedural and theoretical understanding to complete tasks  At Levels 4-6: A1: Critically evaluate accounting concepts	<ul> <li>Acquisition of knowledge and understanding is facilitated through either:</li> <li>a combination of online learning blended with face to face learning which will include, workshops and tutorials; group discussions and independent and directed study, supported throughout by comprehensive online teaching materials and broader resources; or</li> <li>online learning which will include facilitated group discussion, independent and directed study, supported throughout by comprehensive online teaching materials and broader online resources</li> <li>We achieve this through a pedagogy that includes project work,</li> </ul>	Assessment methods and strategies:  In general, our assessment strategy encourages a variety of assessment methods (where appropriate) all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills. It should be note that in terms of this accountancy programme there is an emphasis on examination as this matches the requirements of the ACCA.			
and principles and their application in solutions to practical accounting problems.  A2: Prepare financial statements of entities, including groups of companies, using relevant financial information, accounting techniques and standards; and to analyse and interpret such financial statements.  A3: Use relevant management accounting techniques with cost information, for	<ul> <li>group forums and project-based activities.</li> <li>That is: Asynchronous <ul> <li>Independent and directed student study, supported throughout by comprehensive online multi-media teaching materials and resources accessed through our VLE</li> <li>Guided group / project based work</li> <li>Discussion forums where students discuss and critically engage with themes emerging from the materials they engage with, following the posing of questions or propositions, case studies</li> </ul> </li> </ul>				
planning, decision-making, performance evaluation and control, within different business settings.  A4: Apply financial management techniques to issues affecting investment, financing, and dividend policy decisions of an organisation.	<ul> <li>Face to face seminars where theory and practice are integrated.</li> <li>Following the posing of questions or propositions, case studies or similar by either tutor or students themselves</li> <li>Podcasts and narrated PowerPoints</li> </ul>				

- A5: Understand the general legal framework, and apply specific legal principles relating to business, including taxation legislation as applicable to individuals, single companies and groups of companies.
- A6: Explain the process of carrying out the assurance (audit) engagement and its application in the context of the professional (audit) regulatory framework.
- A7: Describe the organisational context of the accountant and of the development of accounting information systems; to understand the need for the efficient use of resources within an organisation.
- A8: Prepare non-complex financial statements using generally accepted accounting principles.
- A9: Evaluate and comment on the performance and financial situation of organisations using a range of interpretative techniques.
- A10: Select and apply appropriate accounting and financial management techniques to organisational business planning, decision-making and control.
- A11: Understand the limitations of accounting techniques and the implications of such limitations.
- A12: Communicate analysis of accounting and financial information and

- Independent and directed student study, supported throughout by comprehensive teaching materials and resources.
- Guided group / project-based work

Throughout, the learner is encouraged to undertake independent study to both supplement and consolidate what is being learnt and to broaden their individual knowledge and understanding of the subject. Learning is facilitated largely by set tasks with regular tutor support including small group forums. This allows students to not only discuss with staff their own work and progress, but to also see other students' work and to engage in the discussions that relate to the work of their peers.

There is a requirement for written work at all levels including reports, essays, practical tasks, developed plans, time constrained set work, etc. Our assessment strategy informs how feedback is supplied by tutors at the formative and summative assessment phases. Developing critical analysis through a structured taxonomy is encouraged as students' progress through levels 4 - 5 levels culminating in a dissertation.

All students complete an induction module prior to starting on subject discipline units of work. The induction module requires students to undertake a range of tasks that both test and develop subject specific and online pedagogical knowledge, understanding, and skills.

recommendations to a variety of different audiences.  A13: Communicate appropriately in writing and through an oral presentation.  A14: Demonstrate comprehension of basic mathematical functions.  A15: Demonstrate an appreciation of ethical issues associated with professional practice.	The means by which these outcomes are achieved	The means by which these outcomes
11b. Intellectual (thinking) skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
At Level 3 B1/0 Apply knowledge and understanding to basic, non-complex situations to solve problems.  At Levels 4-6: B1: Solve problems through the identification of key issues, synthesis of information and analytical tools, and the presentation and critical evaluation of a range of options.  B2: Undertake an independent Research Report relating to a single organisation or industry sector.  B3: Prepare a written report which meets academic requirements of information collection and referencing of information sources.  B4: Complete a programme of study through independent and selfmanaged learning.	Intellectual skills (B1 – B5) are developed throughout the programme by the methods and strategies outlined in section A, above. Intellectual development is further encouraged via formative assessment tasks including set briefs, in-module activities, self-initiated briefs, and discussion with tutors and peers (in online forums/debates).  Specific modules support the development of quantitative and qualitative analysis, and the development of self-reflective skills. In addition, the student's thinking skills will be evident in a summative assessment process which requires and rewards learners for the demonstration of creative thinking and problem solving, analysis, judgement and self-reflection in the development of solutions.  Throughout, the learner is encouraged to develop intellectual skills by undertaking further independent study and research in order to further consider a range of perspectives.	Assessment methods and strategies:  Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills, however within this particular programme there is an emphasis on formal examinations as this matches the specific requirements of the ACCA.

B5: Understand the limitations of acquired knowledge of legal and taxation issues and recognise the need to seek further specialist advice where necessary.		
B6: Reflect on the learning attained through completing the programme and its impact on future professional development and employment roles.		
11c. Practical skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
Level 3 C1/0 Demonstrate a range of core academic skills to support study at undergraduate level. C2/0 Identify, access and evaluate a range of information sources for currency, scope and credibility.	Practical and professional skills are employed in the production of solutions to real life situations developed through exercises and practical case study type activities culminating in summative assessment tasks as noted in assignment briefs. The important modern-day skills of managing or leading projects and/or teams working within differing organisational and national cultures are provided by specific modules, as are specific inputs with an emphasis upon practical functional decision-making skills related	To support the development of practical skills, students must supply worked materials and evidence in completion of their assignments. Critical reasoning, good presentation and sound evidence trails in assignments are all rewarded.
At Levels 4-6: C1: Engage in academic debate about the environment of business in a professional and ethical manner.	to business and management knowledge.  Practical skills are further developed and integrated through a series of in-course online activities and projects intended to test	
C2: Demonstrate self-management and work productively and independently to produce work in a variety of formats as specified.	skills acquired. Group discussion forums provide opportunities for peer to peer discussion of ideas and of the work of others and its strengths and weakness; this particularly supports the development of C6. Activities are provided so that students can	
C3: Present information clearly and coherently in an appropriate form using subject specific terminology.	work independently to consolidate their knowledge and grasp of practical skills. The in-course activities and assessment process in the final year particularly emphasise the acquisition of C6 with	
C4: Show an ability to read a range of complex academic works suitable for study at undergraduate level,	specific modules devised to highlight the practical differences in business and management skills required in differing contexts.	

summarising the arguments accurately

	and weighing up the merits and		
	substance of arguments.		
C5:	Examine practical, theoretical and		
	ethical issues associated with the use		
	of different methodologies, paradigms		
	and methods of analysis.		
C6:	Identify and evaluate alternative		
	academic perspectives to contentious		
	issues in business and management		
	and integrate ideas and findings.		
C7:	Formulate research questions, deploy		
	appropriate research methodologies		
	and data collection methods and		
	evaluate research findings examining

1			process. Students must take

- methodologies at a level suitable for an undergraduate student.
- D2: Develop interpersonal skills of effective listening, negotiating, persuasion and presentation.
- D3: Reflect on working effectively in collaboration with others and evaluate own strengths and weaknesses and acting on feedback.
- D4: Take responsibility for own learning, acting independently in planning, and managing tasks with limited guidance.

All modules promote practical application and employability that a student may develop further in their Dissertation topic at level 6 if they wish.

Modules increasingly include content with regard to the global business environment and matters of culture. The Managing Across Cultures module at level 5, combined with the Contemporary Management Issues module at level 6 provide a targeted focus for these aspects in also evidenced in the supporting materials and assessments used throughout the programme.

As work becomes more progressively more complex at levels 5 and 6, students are required to draw upon their skill sets to manage increasingly large workloads. Students are required to complete a number of assignments and a Dissertation in level 6 that demonstrate independence and originality, and critical enquiry, and which further enhance communication and self-reflective skills. (D1 and D3)

responsibility for their own work. All assignments require students to engage in critical enquiry and self-reflection which is rewarded in marking guides. These guides, in line with good practice, are available to students and are included with every assignment brief.

# 12. Graduate Attributes and the means by which they are achieved and demonstrated

#### **Graduate Attributes**

The concept of the Arden University Graduate, based upon the definition of 'graduate attribute' by Bowden et al (2000) has been developed around 6 attributes

E01 – Discipline Expertise

**E02 – Effective Communication** 

E03 - Responsible Global Citizenship

E04 - Professional Skills

E05 – Reflective Practitioner

E06 – Lifelong Learning

All six attributes are relevant to this programme and form a specific learning outcome in each module.

# The means by which these outcomes are achieved and demonstrated

The achievement of these attributes is integrated into all programmes of study curriculum, unit study tasks (individual and group work) and through summative assessment tasks. A contextualised version of the AU Graduate Attributes forms the last Learning Outcome on each Module Descriptor Form. Note — the graduate attribute itself is embedded across the module and therefore within the assessment strategy (formative & summative).

# 13. Learning and teaching methods and strategies

Learning and teaching methods and strategies are delivered through a blended and integrated learning and teaching pedagogy that includes both asynchronous and synchronous activity.

#### For Online Learners:

Asynchronous

- Independent and directed student study, supported throughout by comprehensive online multi-media teaching materials and resources accesses through our Virtual Learning Environment
- Guided group / project-based work
- Research tasks
- Discussion forums where students discuss and critically engage with themes emerging from the online materials they engage with, following the posing of questions or propositions, case studies or similar by either tutor or students themselves.
- Podcasts and narrated PowerPoints

# For Blended Learners:

**Synchronous** 

- Face to face activity workshops and seminars where theory and practice are integrated.
- Independent and directed student study, supported throughout by comprehensive teaching materials and resources.
- Guided group / project-based work

Based upon the profile of our typical student profile, our strategy enables students to engage with a variety of learning tools that best meet their learning styles, overall objectives and personal circumstances. Developing independent study skills is the cornerstone of the learner experience, supported by peer engagement and engagement with the tutor and academic skills team. There is a requirement for written work at all levels including reports, essays, practical tasks, developed plans, timed examinations, portfolios of work etc., and our assessment policy informs how feedback is supplied by tutors at the formative and summative assessment stage.

### 14. Assessment methods and strategies

Our assessment strategy encourages a variety of assessment methods all explicitly aligned to learning outcomes that focus upon knowledge, understanding and skills. These are contextualised so that the

assessment is directly relevant to each subject area and assessment methods include case study analysis, written essay, critical self-reflection, portfolios of evidence, sector report production, time constrained tests, etc.

#### 15. Employability

Our approach pays due regard to the UKCES report 'The Employability Challenge' (2009a) definition of employability, 'the skills almost everyone needs to do almost any job. They are the skills that must be present to enable an individual to use the more specific knowledge and technical skills that their particular workplaces will require.' Employability is an important strand integrated into the curriculum, learning tasks and summative assessment.

The development of key skills for future employability is reflected and embedded through the AU values (Programme Outcomes C & D) and the AU Graduate Attributes. This development is supported throughout the student journey with the suite of tools provided by the Ab Integro Careers Portal on the student home page.

# **16. Entry Requirements**

- IELTS 6.0 (no less than 5.5 in any element) or equivalent for students whose medium of prior learning was not English.
- Candidates who demonstrate an ability to study the programme as evidenced through previous a personal statement (of between 350-500 words) or interview taking into account:
- their motivation for undertaking the programme
- relevant work experience
- prior qualifications
- references
