

# **MSc Telecommunications Management**

# **Programme Handbook**

Published March 2020

Version 5

#### Introduction to the Programme

Welcome to the MSc Telecommunications Management programme. This handbook provides you with information about the structure of your programme.

The programme is made up of the seven core modules listed in the table below. An outline of the content of each of the modules and the assessment methods used can be found in the Module Descriptor section of iLearn.

#### **MSc Telecommunications Management Modules**

Module Code	Module Title	Credits	Module Type (Core/Option)
BUS7008D	Business Plan Development	20	Core
PRM7004D	Project and Portfolio Management	20	Core
COM7003D	Technology and Trend Monitoring	20	Core
COM7009D	009D Wireless Technology and Networks		Core
COM7010D Core Network and Internet Infrastructure		20	Core
COM7011D	O11D Telecoms Environment and Operations		Core
RES7001D	Research Project	60	Core

Please note that modules may not be delivered in this order; please refer to your course timetable.

#### Pace of Study

#### <u>Student Loans Company Funded Students</u>

If you have been granted a postgraduate loan from the Student Loans Company, you must progress at an appropriate pace to complete within <u>two years</u>. Arden University is required to make annual reports to the Student Loans Company regarding your progress. If you fall behind, or if you decide you would prefer to study at a slower pace, you may transfer to the Flexible Distance Learning route (see below). However, if you transfer to the more flexible route, you will not be eligible for any continued loan payments from the Student Loans Company.

#### Flexible Distance Learning Students

If you have chosen the flexible distance learning route and have not received a postgraduate loan from the Student Loans Company, you have the flexibility to plan your own pace of study. Postgraduate degrees usually take around two to three years to complete depending on how many modules you study each year. In order to achieve this it is recommended that you aim to complete at least 60 credits each year, equivalent to three 20-credit modules. You will have a maximum of five years to complete the programme (from the date you first started).

#### **Arden University Assessment Regulations**

Students will be assessed in accordance with the standard Arden University assessment regulations which can be found on the Arden University website <a href="http://arden.ac.uk/">http://arden.ac.uk/</a>

#### PROGRAMME SPECIFICATION

1. Target Award	MSc
2. Programme Title	MSc Telecommunications Management
3. Exit Awards	PG Diploma in Telecommunications Management
	PG Certificate in Telecommunications Management
4. Programme Leader(s)	Mohammed Rehman
5. Delivery Model	Online
	Blended learning delivery by Arden University staff and supported
	via the VLE
6. Start date	January 2017
7. Programme Accredited by	
(PSRB or other, if applicable)	
8. UCAS Code (If applicable)	
9. Relevant QAA subject	QAA Master's Degrees in Computing (2011) QAA General Master's
benchmark statement	Degrees (2015)

## 10. Programme Aims

The aim of the Arden University MSc Telecommunications Management programme is to provide a distinctive, inter-disciplinary and integrative educational programme aimed primarily at individuals who are either employed in or are desirous of entering management or strategic roles within the telecommunications sector. The programme is designed to expose participants to a range of relevant topics relating to management within a telecommunications context.

Online teaching materials are derived from established academic research in order to develop critical powers of analysis, reflection and the further development of interpersonal skills in preparation for management roles.

Programme participants will build on their existing understanding of the management of computing or telecommunications projects and organisations in a way that allows them to relate this to a range of contemporary management ideas and practice within a global context as well as developing skills commensurate with the selected pathway such as information security, enterprise design and infrastructure management. This is achieved through critical thinking, creativity and personal development.

In particular, based upon the established tasks and responsibilities associated with graduates, the purpose of the programme is to enable students to demonstrate the following:

Critically evaluate and apply skills and knowledge to identify and devise business improvement opportunities and create innovate proposals

Undertake evaluation of implementation through taking ownership of systematic review process to assess benefits.

An ability to evaluate the impact of project and portfolio management on the operations of information management and telecommunications operations.

A maintenance of currency related to existing telecommunications technology.

A critical appreciation of the potential, and ethical impact of emerging technology and trends and ways to leverage these for maximum impact.

Commitment to taking ownership for the reliability, confidentiality, security and integrity of telecommunications systems

Arden Values Mapping: the table below identifies how programme outcomes (listed within section 11) meet provide for full coverage of Arden University Values.

	Knowledge &	Intellectual	Practical	Transferable
	Understanding	Thinking	Skills	Skills
We Support	A2		C3	D1, D5
People				
We Do the Right	A1, A6, A7	C3		D6, D7
Thing	hing			
We Innovate	A3, A4, A7	B1, B2		D6
We Take	A1, A2, A3, A4,	B1, B2	C1, C2,	D1, D2, D3, D4,
Ownership	A5, A6, A7		C3	D5, D6, D7

#### 11. Intended programme learning outcomes and the means by which they are achieved and demonstrated MSc (180 credits) The means by which these outcomes are demonstrated 11a. Knowledge and understanding The means by which these outcomes are achieved A1 – Analyse business planning methods and Knowledge and understanding are assessed through in-Learning and Teaching methods and strategy: generate innovative telecommunications solutions module assessments of portfolio submissions, Acquisition of knowledge and understanding (A1 – A5) presentations, time-constrained examinations, and to meet planning needs at all levels is through an integrated learning and report based assignments. A2 - Evaluate the implications or project and teaching pedagogy that includes both asynchronous portfolio management on the fulfilment of and synchronous activity. That is: Formative assessments are the precursor to the telecommunications projects in the workplace summative assessments. Appropriate and diverse Asynchronous formative assessments are provided for students and A3 – Critically understand the evolution of are communicated to them via a clear overview to be Independent and directed student study, supported technological trends and evaluate opportunities for found in the assessment brief for each module. throughout by comprehensive online multi-media adoption of emerging technologies in teaching materials and resources accesses through our telecommunications practice VLE A4 – Demonstrate a critical awareness of Guided group / project based work telecommunications technology development and their innovative applications Discussion forums where students discuss and critically engage with themes emerging from the A5 – critically evaluate network and internet materials they engage with, following the posing of infrastructure methods questions or propositions, case studies or similar by A6 – Evaluate the environment of either tutor or students themselves telecommunications operations to include ethical Podcasts and narrated PowerPoints and practical implications **Synchronous**

A7 – Undertake self-led research into	Online seminars facilitated by VOIPs where theory and	
telecommunications issues in the workplace	practice are integrated.	
demonstrating an ethical approach to the		
application of research principles.	Live chats	
	Deced when the weefile of any trunical student hadro	
	Based upon the profile of our typical student body,	
	our strategy enables students to engage with a variety	
	of learning tools that best meet their learning styles,	
	overall objectives and personal circumstances.	
	Independent study is the cornerstone of the learner	
	experience supported by engagement with the	
	specialist tutor and peer engagement.	
	a construction and page of Guidensetts	
	There is a requirement for written work at all levels	
	including reports, essays, practical tasks, developed	
	targeted plans etc., and our formative assessment	
	policy informs how feedback is supplied by tutors at	
	the draft assessment phase.	
11b. Intellectual (thinking) skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
B1 - Demonstrate the ability to apply models and	Intellectual skills (B1, B2) are developed throughout	Intellectual skills are assessed through a combination of
theories critically and innovatively to a range of	the programme by the methods and strategies	in-course formative exercises and summative
situations of different complexity, with the outcome	outlined in section A, above.	assignments, including the submission of portfolios, self-
of giving effective and realistic advice.		reflective evidence, statistical analyses, qualitative
	Specific modules support the development of	judgements, and research reports/dissertation.
B2 – Undertake innovative individual and	quantitative and qualitative analysis, and the	
collaborative research on a topic relevant to the	development of criticality and self-reflective skills. In	
work of a telecommunications manager and report	addition, the student's thinking skills will be evident in	
the research with appropriate recommendations.	a summative assessment process which requires and	
	rewards learners for the demonstration of creative	
	thinking and problem solving, analysis, judgement and	
	self-reflection in the development of contextually	

	relevant solutions, and a willingness to explore and engage with a range of media.  Throughout, the learner is encouraged to develop intellectual skills further by undertaking further independent study and research.	
11c. Practical skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
C1 - Develop personal skills to increase effectiveness in managing telecommunications projects.  C2 - Show the ability to identify practical solutions to relevant theoretical and practical problems.  C3 - Demonstrate an ethical and supportive approach to management within an innovative telecommunications context	Practical and professional skills are employed in the production of solutions to real life situations developed through set briefs, exercises and practical activities. The important modern day skills of managing projects, working within differing organisational and national cultures are provided by specific modules, as are specific inputs with an emphasis upon practical functional decision making skills related to market planning and strategy, market intelligence and communications; managing others; and managing knowledge in addition to specific practical skills commensurate with the chosen pathway.	To support the development of practical skills students must supply worked materials and evidence in support of their assignments. Critical reasoning, good presentation and sound evidence trails in all assignments are rewarded. Assessment briefs include a variety of commercial and geographical contextual setting. Students receive feedback on all activities and assignments which includes practical examples for improvement in the application of theory to practice to help them improve both aspects of their skill base.
	Practical skills are further developed and integrated through a series of in-course online activities and projects intended to test skills acquired. Group forums provide opportunities to discuss ideas, progress, the work of others and the strengths and weakness in the work presented. Activities are provided so that students can work independently to consolidate their knowledge and grasp of practical skills. The in-course activities and assessment process in the final year particularly emphasise the acquisition of practical skills with specific modules devised to highlight the practical	

	differences in management skills required in differing contexts.	
11c. Transferrable skills	The means by which these outcomes are achieved	The means by which these outcomes are demonstrated
D1 - Critically reflect to support enhanced learning, self-awareness and collaboration with others  D2 - Identify and critically evaluate pertinent issues, taking responsibility for the generation of relevant and workable solutions within a telecommunications organisation  D3 - Undertake effective communication and presentation skills  D4 - Effectively use ITC to communicate in a variety of settings  D5 - Work independently and collaboratively to take responsibility for own learning and that of others  D6 - Undertake multidisciplinary research through the acquisition of skills relevant to telecommunications  D7 - Effectively plan and undertake personal development including the awareness of an ethical and socially responsibly dimension to decision making	Personal responsibility becomes an increasingly important skill as students' progress, culminating in the writing of the Dissertation.  As the programme progresses work becomes more complex and students are tested on their abilities to respond positively to feedback from a variety of audiences, as well as to manage increasingly large workloads. Students are required to complete a number of assignments and a 'research artefact' that rewards independence originality, and critical enquiry, and which further enhance communication and self-reflective skills.	To develop transferable skills all assignments must meet time deadlines and word count guidelines. All assessed work must be submitted independently even where group activity has been an element of the process.  Students must take responsibility for their own work. All assignments require students to adopt a spirit of critical enquiry and self-reflection which is rewarded in marking guides. These guides are shared with students.

#### **Exit Awards: Programme Outcome**

Exit Award	Knowledge & Understanding	Intellectual Skills	Practical Skills	Transferrable Skills
Post Graduate Diploma (120 credits)	A1, A2, A3, A4, A5, A6	B1	C1, C2, C3	D1, D2, D3, D4, D5
Post Graduate Certificate (60credits)	A1, A2, A3	B1	C1, C2, C3	D1, D2, D3

#### 12. Graduate Attributes and the means by which they are achieved and demonstrated

#### **Graduate Attributes**

The concept of the Arden University Graduate, based upon the definition of 'graduate attribute' by Bowden et al (2000) has been developed around 6 attributes.

Lifelong Learning: Manage employability, utilising the skills of personal development and planning in different contexts to contribute to society and the workplace.

Reflective Practitioner: Undertake critical analysis and reach reasoned and evidenced decisions, contribute problem-solving skills to find and innovate in solutions

Professional Skills: Perform effectively within the professional environment. Work within a team, demonstrating interpersonal skills such as effective listening, negotiating, persuading and presentation. Be flexible and adaptable to changes within the professional environment

Discipline Expertise: Knowledge and understanding of chosen field. Possess a range of skills to operate within this sector, have a keen awareness of current developments in working practice being well positioned to respond to change.

Responsible Global Citizenship: Understand global issues and their place in a globalised economy, ethical decision-making and accountability. Adopt self-awareness, openness and sensitivity to diversity in culture.

Effective Communication: Communicate effectively both, verbally and in writing, using a range of media widely used in relevant professional context. Be IT, digitally and information literate.

Discipline Expertise: Knowledge and understanding of chosen field. Possess a range of skills to operate within this sector, have a keen awareness of current developments in working practice being well positioned to respond to change

#### The means by which these outcomes are achieved and demonstrated

All six attributes are relevant to this programme, however, five will be developed throughout Level 7 of the MSc Engineering Management where they are integrated into all modules and assessed via

unit study tasks (individual and group work) and through summative assessment tasks. Some graduate attributes are assessed in more than one module allowing for greater development of skills.

#### **Graduate Attribute Mapping**

Module	Graduate Attribute
Business Plan Development	Lifelong Learning: Manage employability, utilising the skills of personal development and planning in different contexts to contribute to society and the workplace.
Technology and Trend Monitoring	Reflective Practitioner: Undertake critical analysis and reach reasoned and evidenced decisions, contribute problem-solving skills to find and innovate in solutions
Telecoms Environment and Operations	Professional Skills: Perform effectively within the professional environment. Work within a team, demonstrating interpersonal skills such as effective listening, negotiating, persuading and presentation. Be flexible and adaptable to changes within the professional environment.
Research Project Project and Portfolio Management	Discipline Expertise: Knowledge and understanding of chosen field. Possess a range of skills to operate within this sector, have a keen awareness of current developments in working practice being well positioned to respond to change.
Wireless Technology and Networks	Responsible Global Citizenship: Understand global issues and their place in a globalised economy, ethical decision-making and accountability. Adopt selfawareness, openness and sensitivity to diversity in culture.
Core Network and Internet Infrastructure	Effective Communication: Communicate effectively both, verbally and in writing, using a range of media widely used in relevant professional context. Be IT, digitally and information literate.

# 13. Learning and teaching methods and strategies

# **Distance Learning**

Acquisition of all learning outcomes is via engagement with the online module learning material and the online tutoring and programme participant support mechanisms, both of which are delivered via Arden University's ilearn platform (a moodle-based system). The learning material comprises purpose-written self-contained lessons with frequent activities and feedback to generate learning

and reinforce the knowledge acquisition through frequent application of learning to specific examples.

Embedded within the text are links to further reading and appropriate websites. Feedback within the learning material is provided to allow programme participants to check their understanding with that of the tutor. Additionally, group learning activities direct programme participants to the tutor-facilitated discussion forums where they engage in discussion with their peers and receive formative feedback from the module tutor.

Each of the 20 credit modules provide programme participants with an understanding of key theoretical and practical management issues, debates and academic informed literatures.

Teaching/learning methods adopted are transferrable across modules and are similar across modules and include online class discussions, exercises/case studies and group discussions.

For each subject being taught a programme of structured online learning activities using both formative and summative assessment is applied. The emphasis is on action learning through the mediation of the module leader for each module.

Learning and Teaching activities are:

#### **Asynchronous**

Independent and directed student study, supported throughout by comprehensive online multimedia teaching materials and resources accesses through our Virtual Learning Environment

Guided group / project based work

Research tasks

Discussion forums where students discuss and critically engage with themes emerging from the online materials they engage with, following the posing of questions or propositions, case studies or similar by either tutor or students themselves

Podcasts and narrated PowerPoints

#### **Synchronous**

Online seminars facilitated by VOIPs where theory and practice are integrated

Live chats

Based upon the profile of our typical student body, our strategy enables students to engage with a variety of learning tools that best meet their learning styles, overall objectives and personal circumstances. Independent study is the cornerstone of the learner experience, supported by subject specialist engagement with the tutor and peer engagement.

#### **Blended Learning**

A strategy which incorporates elements from the above criteria plus the support of face to face input will be utilised.

A-synchronous learning will be supported by in class face to face lectures, seminars and workshops. Students will have full access to the ilearn platform and all programme resources within it. Formative opportunities will be available in class and also via Adobe hosted seminars.

Students will also have access to learning resources at each partner institution.

Student leaning will be supported and nurtured at our partner institutions by our tutor team and dedicated centre administrator and on line via our student support team.

Summative submissions will all be made via the Turnitin platform.

#### 14. Assessment methods and strategies

The assessment process involves both formative and summative elements and is continuing in nature.

There will be a focus on encouraging students to apply their knowledge to practical situations. A significant part of this comes from the Dissertation module. Here students will be required to identify a topic of interest to them, which falls within the encompassing field of management. Students will explore this, and will apply their research to the topic, putting forward recommendations which are of practical benefit to the organisation.

The approach to coursework assignments will be to encourage students to apply their knowledge to organisations or case study data sets. This could be achieved through the use of case studies but will also involve employees applying information and approaches to their own organisations, or an organisation with which they are familiar.

The assessment designed for each module reflects the intentions of that module and will measure the identified learning outcomes. A variety of assessment strategies will be used to reflect and test the achievement of the learning outcomes. These are detailed within each module and mapped in the table below. Assessment questions and cases are seen to be dynamic and are reviewed quarterly in order to maintain rigour and reflect changes in professional focus and practice.

There is a requirement for written work at all levels including reports, essays, developed plans, portfolios of work etc. and our assessment policy informs how feedback is supplied by tutors at the formative and summative assessment stage. Critical analysis is encouraged at all levels culminating in a Dissertation.

#### 15. Employability

Entrants to this programme are highly likely to be in work, (be it Full or part Time). MSc Telecommunications Management programme is designed to offer the degree of flexibility required

to ensure that even those employed in full time positions have the maximum opportunity to fulfil their programme of study. The programmes aim to develop skills and knowledge such that graduates can confidently enter the telecommunications management environment or can improve their existing career prospects within it. This degree develops a range of transferrable skills and provides opportunities for these to be evidenced. In particular, the final research project provides the ability to demonstrate higher level academic skills.

The distributed nature of Arden University students makes conventional careers support difficult but the use of the Abintegro provider allows us to offer a range of support in career development and there are opportunities for students to purchase more specialist support if required.

The addition of imbedded graduate attributes adds value to the qualification in terms of providing industry ready graduating students.

#### **16. Entry Requirements**

Arden University is keen to ensure that the programme is available to all those who can benefit from it.

Normally entry is via:

A degree equivalent to UK second class honours standard.

English ability equivalent to IELTS 6.5 (no less than 6.0 in any element), where the medium of undergraduate study was not English;

Applicants with existing postgraduate computing management awards may be eligible for entry with advanced standing and will be considered through the APL process.

Applicants who have substantial managerial experience (typically 5 years) and are able to demonstrate via references and supporting curriculum vitae an ability to successfully complete the programme may be admitted where they do not possess degree equivalent qualifications. It is not intended to offer exemptions based on experiential learning.
